

## FAQ - Simple Wound Care Service

To help with quick answers to specific points, please see list of frequently asked questions. These will be reviewed and updated as we receive feedback.

### What is the simple post-op wound care service?

Most cuts and grazes can be treated at home and will start to heal in a few days. But some wounds may need to be treated by a medical professional if there's a risk of infection, if the injury is serious, or if you have recently had an operation.

Simple wound care services are available across North East London to support you with managing wounds such as skin ulcers, first degree burns, post-surgical sutures, clips removal and routine dressings.

### When should I access the simple wound care service?

You should make an appointment with the service when you are advised by your doctor or nurse that you need your wound to be cared for with a dressing.

### Why will different areas have different providers?

To ensure that we have equal coverage across our boroughs, this service will be provided at community sites, by NELFT NHS Foundation Trust and some GPs, meaning that we can ensure greater choice and access for our residents.
